Java Full-Stack Developer — Spring Boot — Microservices — REST APIs — React JS

Summary

Result-driven Java Developer skilled in designing and developing enterprise-level Spring Boot and Microservices applications. Adept at REST API development, Spring Security, and database integrations with Oracle/MySQL. Experienced in optimizing backend processes, generated automated reports, and deploying scalable solutions using Docker and Jenkins.

Professional Summary

- Proficient in Java, JDBC, Servlets, Spring Framework, Spring Boot, Spring Data JPA, REST APIs, Spring Cloud, Microservices, and Spring Security.
- Build batch jobs for scheduled business processes and data transformations.
- Experienced with MySQL, and H2 databases.
- Hands-on experience with DevOps tools such as Git, Maven, Docker.
- Knowledgeable in design patterns: Factory, Singleton, Strategy, Template Method, and MVC.
- Strong understanding of Core Java concepts: OOP, Exception Handling, Collections, and Serialization.
- Motivated, adaptable, and an effective team player with a quick learning ability.

Experience

Intern – Software Development
New Zen InfoTech, Hyderabad

Apr 2025 – Jun 2025

- Enhanced web applications using Java, Spring Boot, MySQL, React JS, and JWT.
- Built and tested REST APIs, integrated frontend/backend modules.
- Unified authentication/authorization using Spring Security and JWT.
- Performed database operations with JPA/Hibernate, optimized SQL queries.
- Collaborated in Agile environment using Git for version control and code reviews.

Technical Skills

Languages	Java, JavaScript
Frameworks	Spring Boot, Spring MVC, Spring Data JPA, Spring REST, Spring Security, Spring Batch
Microservices	RESTful APIs, DTO Mapping, and Inter-Service Communication
DevOps	Git, GitHub, Docker, Jenkins, Postman, Swagger
Databases	MySQL
Frontend	HTML, CSS, JavaScript, Bootstrap, React JS
Testing	JUnit, Mockito

Education

B.Tech (Electrical Engineering) - Aurangabad College of Engineering
CGPA: 8.19
Diploma (Electrical Engineering) - Govt. Polytechnic, Jalna
SSC (10th) - Oxford English High School, Jalna

Projects

E-Commerce Web Application

Java, Spring Boot, MySQL, React JS, JWT

- Built a scalable platform with user/admin roles.
- Implemented Spring Security, JWT authentication, and BCrypt encryption.
- Designed REST APIs for product/cart/order management with layered architecture.
- Developed a responsive React JS frontend integrated with backend APIs.
- Merged multiple Microservices using Spring Boot, Spring REST, and Spring Data JPA with API Gateway, Load Balancer, Eureka Server, Config Server, and Distributed Logging.
- Implemented asynchronous processing for background tasks and email notifications using Spring Boot Mail.
- Integrated ModelMapper for DTO/entity mapping across services.
- Externalized configurations using Spring Cloud Config with GitHub for centralized management.
- Containerized services with Docker and automated builds using the Jenkins CI/CD pipeline.
- Monitored microservice health using Spring Boot Actuator and centralized logs with ELK stack.
- Performed API testing using Postman and created Swagger documentation for interactive API reference.

Key Achievements

- Optimized report generation performance by 70% using Spring Batch chunk processing.
- Built a dynamic notification module reducing manual effort by 90%.
- Reduced onboarding failure rate with SSN-based eligibility checks.
- Contributed to CI/CD pipeline design integrating Docker, GitHub, Jenkins.

Soft Skills

- Problem solving
- Team Collaboration
- Communication
- Ownership Mindset
